

# Full Stack App Dev & Design for Tech Freelancer Marketplace

## PROJECT DETAILS

 UX/UI Design, Custom Software Development

 Jul. 2025 - Ongoing

 Less than \$10,000

*"FuzionDev LLC understands our intent and business value."*

## PROJECT SUMMARY

FuzionDev LLC has designed and developed a full stack application for a tech freelancer marketplace. The team has also handled the full deployment of the app, additional webhooks, and component development.

## PROJECT FEEDBACK

FuzionDev LLC has achieved milestones through QA testing against functions and frontend testing. The team has also done server route testing autonomously in conjunction with the Vercel deployment engine. Moreover, FuzionDev LLC delivers on time and consistently updates the client on progress.

## The Client

Introduce your business and what you do there.

I'm the founder of Techzen.ai, an on-demand tech freelancer marketplace connecting businesses and individuals with vetted tech professionals for remote or on-site support across a wide range of IT and technology services nationwide.

## The Challenge

What challenge were you trying to address with FuzionDev LLC?

We needed help with full-stack application development.

### CLIENT RATING

**5.0**

Overall Score

Quality: 5.0

Schedule: 5.0

Cost: 5.0

Would Refer: 5.0

## The Approach

### What was the scope of their involvement?

FuzionDev LLC has developed a full-stack application using Next.js as the framework. The team has also been responsible for the full deployment of the app and additional webhooks and component development as needed. The team has created an app router with pages as needed and handled API integrations with Stripe, Veriff, and Vercel deployment. FuzionDev LLC has also created a database schema using PostgreSQL from Vercel. In addition to development, the team has designed the app using Figma. The team has also provided a weekly review of maintenance of any server errors as they occur.

### What is the team composition?

We've worked with 2–5 teammates from FuzionDev LLC.

### How did you come to work with FuzionDev LLC?

We found them through a referral. We chose them over other options because they had high ratings, their pricing fit our budget, and their company values aligned with ours.

### How much have you invested with them?

So far, we've spent less than \$10,000.

### What is the status of this engagement?

We started working together in July 2025, and the engagement is ongoing.

## The Outcome

What evidence can you share that demonstrates the impact of the engagement?

FuzionDev LLC has achieved milestones through quality assurance testing against functions and frontend testing. The team has also done server route testing autonomously in conjunction with the Vercel deployment engine. So far, we haven't had any return errors, and static rendering has been successful, showing any updated information as needed to encompass server fetching against database data.

## How did FuzionDev LLC perform from a project management standpoint?

FuzionDev LLC has delivered on time and always keeps me updated. We communicate through virtual meetings, emails, and messaging apps.

## What did you find most impressive about them?

FuzionDev LLC understands our intent and business value.

## Are there any areas they could improve?

They could personally keep me updated as components or UI are being developed, only because I have a background in javascript coding.
